Backdoor driver install on Windows 7 and 8

If your printer appears under Unspecified in the Devices and Printers in Windows 7 or 8 you will need to “backdoor” install the printer. The driver will appear with either the printer name or just PhotoPrinter. Click twice on the icon and it will open the Properties. Click on the Hardware Tab.

Click on the Properties button.
Click on the Change Settings button.

Click the Driver tab.
Click Update Driver

Click Browse my computer for driver software
Click browse and click on driver folder. Click Next.

Install driver, the driver is trusted.

Click Close
